

**IN THE SPECIFICATION**

On pages 7-8 of the original Specification, please replace paragraph [34] with the amended paragraph below:

[34] In one embodiment the present invention is directed to a gaming device. The gaming device preferably has a housing that includes a plurality of walls that preferably define an enclosure. The gaming [[dice]] device preferably includes a moveable game element that is attached to the housing. The moveable game element may move in at least a first and a second manner. The gaming device also preferably includes a controller located within the housing and in communication with the moveable game element. The controller preferably is configured to determine a game outcome. The game outcome may be a winning or losing outcome. The controller preferably causes the moveable game element to move in the first manner when a game is ~~placed~~ played on the gaming device. The controller preferably causes the moveable game element to move in the second manner after the controller determines a number of outcomes of the same type.
